

BAHAMA[®]

Easy

On one leg...

Bahama®

Bahama

Founded in 1950 today Bahama designs and manufactures a great variety of high-quality large parasols. National and international customers alike trust in our industrial technology and accurate workmanship. The premium products from Bahama characteristically stand for technical attributes like compactness, durability and wind stability but also for aesthetical features like beautiful designs and materials.

»Made in Germany« – our full range production facility manufactures nearly all parts in house. Bahama further processes sustainable and environmentally friendly materials according to the OEKO-TEX 100 standard, Class 1. The combination of high-quality materials and the structural features allows Bahama to guarantee wind stability for its products, depending on the model, of up to 130 km/h.

And most importantly: we love customer service – from consulting to installation, from cleaning to winter storage and maintenance.

Discover the possibilities of an extended outdoor season. No matter what the weather. Just get to know us!

The Heart of it All

Easy is our entry-level model. This large parasol has an excellent price-to-performance ratio while meeting the high demand of a professional large sized parasol. This is attractive for both commercial as well as private customers.

- * Cost effective despite professional features
- * Telescopic opening and closing for increased ground clearance
- * Quick handling
- * Easy to use
- * An elegant lightweight frame with a long durable life span
- * Parasol weight approx. 17-25 kg
- * Modern, high-quality aluminum finish
- * No loose functional parts like ropes, cranks or connectors
- * Locking handle for optimal fabric tension
- * Component parts suitable for replacement
- * Fast spare parts delivery
- * Maintenance-free product

Product information

1 Textile Membrane | Covering

The fabric, exclusively crafted for Bahama, and the resulting textile membrane combine all the attributes of a durable and sustainable product. These include, next to the high-quality appearance, a number of technical functions.

Exchangeable and washable, one-piece membrane

Highest degree of fabric lightfastness (i.e. Fading)
(DIN EN ISO 105-B02 | Class $\geq 6-7$)

High waterproofness, pressure resistance
(DIN EN 20811, ISO 811 | Water column ≥ 1.000 mm)

Excellent friction resistance
(DIN EN ISO 105-x12 | Class $\geq 4-5$)

Sustainable and environmentally friendly fabrics
with the OEKO-TEX 100 Standard, Class 1

100% polyester weave without any PVC
of approx. 200 g/m^2

High temperature resistance
(DIN 53361 from -30° to $+90^\circ\text{C}$)

2 Installation Options

Both mobile or permanent options are available. All Bahama installation options will adequately secure the parasol.

2.1 In-ground installation (permanent)

Two part in-ground sleeve | bottom part for incasing in concrete, in-ground sleeve* can be adapted to existing foundation

Flush mounting

Aboveground dismantling

2.2 On-ground installation (semi-permanent)

Square, galvanized steel plate with sleeve

$750 \times 750 \times 8$ mm

For solid stone or wood surfaces

2.3 Portable stand (mobile)

Cross-frame for 8 standard square flagstones
($40 \times 40 \times 5$ cm | approx. 17.4 kg/each), 8 flagstones are recommended, possible with one layer of 4 flagstones

Available with or without flagstones

Welded, fire galvanized steel frame (approx. 16 kg)

Adjustable on all four corners

Quick assembly and dismantling

3 Spokes and Support Spokes

The quality of a parasol can only be as good as its supporting and connecting parts.

Individually replaceable spokes and support spokes

Natural polished finish

Wall thickness > 1.2 mm

Welded aluminum hollow profile with special alloy AI F30/32 (no sharp edges)

4 Center Pole

The difference may not be obvious at first sight: but it is easier to stand on two legs. For this reason the large parasols from Bahama have an inner and an outer pole that optically come together to form one. Greater sturdiness also means better stability making them safer at the same time.

Outer Pole

Extruded aluminum hollow profile AI F25

Wall thickness > 2.45 mm

Outer diameter 57 mm

Naturally anodized

Inner Pole

Extruded aluminum hollow profile AI F22

Wall thickness > 2 mm

Outer diameter 48 mm

Naturally anodized

Additional Features

1 Transport Packaging (included in the price)

The parasols leave our production facility in perfect condition. To ensure they arrive in perfect condition they are delivered in a hard cardboard cylinder tube.

Outer diameter approx. 308 mm

Cylinder length approx. 4,180 mm, weight approx. 12 kg

Package weight incl. parasol, depending on parasol and shape, approx. 29 – 37 kg

2 Printing

The Bahama UV printer uses 9 color channels. Even pure white. Only lightfast and highest quality inks are used to ensure color accurate fonts, logos and emblems are positioned with millimeter precision.

References: McDonalds, Starbucks, Heineken, Carlsberg, Bitburger, Gaffel, Café & Bar Celona, Café Extrablatt, Hilton, Kempinski et al.

3 Valance

The valance is hemmed, dyed in the matching color and the edgelines are thermally processed.

4 Protective Cover

Not only does it keep everything together, it also keeps it clean. Film packaging is often not enough protection. To this end – especially for winter or long term storage – a robust protective cover of high quality tarp mesh (Nicotarp) with cording is available.

5 Theft Protection

You wouldn't park your high-end bicycle without locking it up first, right? Protect your parasol from theft with a lock that is securely installed in the mount.

Easy to use

Solid aluminum

Cylinder key lock with a pair of keys

Naturally anodized

Handling

The opening and closing is quick and easy.

OPENING

Take off the safety strap. Lift the ends of the spokes until the parasol opens by itself.

Latch in the spring buckle and press down on the handle.

CLOSING

Lift handle up and unlatch the spring buckle.

Press the handle down onto the pole.
(Passive position).

Push the gripping ring up until the parasol is closed, wrap the safety strap around the parasol.

The excellent appearance and the technical features of the textile membrane can be maintained by adhering to the following closing procedures:

Always pull the tips of the fabric to the outside of a closed parasol

Do not store the parasol with any fabric stuck in between the spokes and support spokes

Spirally wrap the fabric around the center pole

Wrap the safety strap around the parasol to secure the fabric

Dimensions & Technical Data

	Ø 3.1 m	Ø 4.0 m	3.1 × 3.1 m	4.0 × 4.0 m
Model Nr.	Y 2031	Y 2040	Y 2131	Y 2140

Bahama Parasol WITH Telescope

Standard Parasol WITHOUT Telescope

Good to know

Sustainability and Environmental Compatibility

The fabric, exclusively crafted for Bahama, and the resulting textile membrane are certified exclusively according to the OEKO-TEX 100 standard, Class 1 which is awarded by independent institutions. Class 1 meets the demands of baby clothing with skin contact.

The OEKO-TEX pollutant test corresponds to the respective intended use of the textiles and materials. In Germany there are clear and reliable criteria for environmental compatibility and sustainability. Bahama demands of its products that every defect or damaged part can be replaced.

Made in Germany

Bahama's customers always refer back to the great importance of our German production facilities. »Made in Germany« is still a unique selling point and a reason to buy. Bahama's full range production facility is located in Germany.

The combination of the highest quality materials and structural features allows Bahama to guarantee the wind stability of its products, depending on the model, up to 130 km/h. In addition to the technical details of the parasol structure, it is the decisiveness of the textile membranes' color to lightfastness, waterproof material, weight and water column that make each Bahama parasol the highest quality in its class. Trust is placed in Bahama by luxury hotels such as the Burj Al Arab in Dubai, the Hotel Sacher in Vienna and the Dalí Museum in St. Petersburg, USA.

Service

Service greatly influences the life span of a parasol. The exchangeable textile membrane of a Bahama parasol can – after being exposed to all sorts of weather conditions for years – be cleaned or replaced. Our service makes a full technical and general overhaul of the product such that they not only look attractive, but can defy the strongest of winds.

No matter where in Germany you need Bahama's service, the Bahama team or one of our expert partners will be glad to help.

Careful and individual planning

Installation of new parasols

Fitting of new textile membranes

Complete service i.e. assembling and disassembling the large parasols, washing, cleaning and maintenance of the frame and textile membranes.

Membrane service, i.e. fitting and removing the textile membrane, cleaning and repairing

Storage of the returned and serviced large parasols and /or textile membranes.
